

# 5<sup>th</sup> Annual US-Afghanistan Business Matchmaking Conference 2009

October 18 - 20, 2009  
Washington D.C.

## BUSINESS BOOKLET

[www.acci.org.af](http://www.acci.org.af)

**Your Excellencies: High Ranking officials of US Government and Afghan Government, US Private Sector Representatives, Afghan Business Delegations, ACCI and AACC Leadership, Distinguished guests, Ladies and Gentlemen:**

It is an honor for me to be here in this glorious and important event which is being organized with the aim to strengthen the business relations between United States of America and Islamic Republic of Afghanistan.

On behalf of Afghanistan Chamber of Commerce & Industries (ACCI), I would like to welcome you all to the 5th Annual U.S.-AFGHAN BUSINESS MATCHMAKING CONFERENCE that has been initiated by Afghan American Chamber of Commerce (AACC) in collaboration with ACCI.

**Sherkhan Farnood**  
Chairman, ACCI

It is clear that, organizing such events not only strengthens Economic ties between the two countries but also facilitates a conducive environment that brings the private sector representatives of both countries together in order to benefit from the existing bilateral business opportunities. Despite some challenges, Afghan economy is boosting rapidly, in recent years we have witnessed the investment of billions of dollars in the sectors of Mines, Airlines, Telecommunications, Banking, Construction and etcetera. The recent investment of People's Republic of China on Ainak Copper Mine shows that our neighbors are paying deep attention on the opportunities existing in Afghanistan. As the time passes the investment opportunities in Afghanistan attract the international investors and foreign joint investments are practically taking place in the country.

**Ladies and Gentlemen:**

Taking the opportunity, I would like to acknowledge that there are vast investment opportunities in the above mentioned sectors, and ACCI as the representing entity of the private sector and the promoter of Afghan Economy in coordination with the other relevant government institutions is committed to make every possible effort in order to facilitate a favorable environment for those investors and traders who intend to invest and do business in Afghanistan.

I believe that this event will act as an important platform for the exchange of ideas and close cooperation between the traders and investors of both countries and help them to identify the most potential investment opportunities that produce more jobs and help in poverty alleviation.

At the end, once again I thank you all for joining us in today's conference; I also thank my colleagues at AACC and ACCI for their outstanding contributions and hard work for making this event a successful one.

Thank you

Sherkhan Farnood  
Chairman, ACCI

## Afghanistan Chamber of Commerce & Industries (ACCI)

Afghanistan Chamber of Commerce and Industries (ACCI) is an independent, legal, non-government, non-profit and non-political organization which serves the private sector of Afghanistan and strives to facilitate an environment conducive to the economic development of the country. ACCI was established in March 2008 through a merger between the former state controlled ACCI (Established in 1931) and the Afghanistan International Chamber of Commerce (AICC) (Established in 2004). As a strong membership organization representing the entire private sector of Afghanistan ACCI provides local businesses and international investors with the support they need for successful operations in Afghanistan, and achieves this through private sector related public policy advocacy, investment and trade promotion as well as other services.

**M. Qurban Haqjo**  
CEO, ACCI

### Mission Statement:

ACCI's mission is to serve the private sector of Afghanistan and to promote an environment conducive to the growth of Afghan Economy.

### Objectives:

To serve as the voice of the private sector on legislation, regulation and other issues affecting the Afghan business community.

To identify and overcome obstacles hindering private sector growth and development.

To assist in the transition of the Afghan economy to a more private sector-based market economy.

To preserve the values of Afghan communities with the support of civic, social and cultural programmes.

To promote investment and the exchange of ideas as well as to communicate with policy-makers on issues related to investment in Afghanistan.

To provide information and support for both foreign and domestic investments.

### Regional Offices:

In addition to its headquarters in Kabul, ACCI operates in 21 provinces of the country and has regional offices in Andkhoy, Badakhshan, Badghis, Bamyan, Farah, Faryab, Ghazni, Herat, Jozjan, Kabul (KCCI), Kandahar, Kapisa, Kunar, Kunduz, Khost, Mazar-e-sharif, Nangarhar, Nimroz, Paktia, Parwan and Takhar.

### **International Affiliates:**

ACCI's international affiliate offices are:

1. Afghan-American Chamber of Commerce (AACC)
2. Afghan Business Council Dubai (ABC)
3. Netherland Afghanistan Chamber of Commerce (NACC)
4. Afghan China Chamber of Commerce (ACCC)
5. Iran-Afghan Chamber of Commerce (IACC)
6. Canada Afghanistan Business Council (CABC)

New affiliates will be established in Pakistan and Tajikistan in the near future.

### **International Partners:**

In order to facilitate an environment conducive to International trade promotion and strengthen the economic relation between Afghanistan and other countries, ACCI has signed MOUs with the following organizations as its International partners:

1. Republic of Tajikistan Chamber of Commerce and Industries (RTCCI)
2. Federation of Pakistan Chambers of Commerce and Industries (FPCCI)
3. Confederation of Indian Industry (CII)
4. Kyrgyzstan Chamber of Commerce and Industries(KCCI)
5. Kazakhstan Chamber of Commerce and Industries

ACCI has also got the membership of International Chamber of Commerce (ICC), Islamic Chamber of Commerce (ICCI), SAARC Chambers of Commerce, ECO Chambers of Commerce and.

### **Membership Benefits:**

ACCI offers a variety of benefits to its members, according to their membership types. The following services are provided to all members irrespective of their membership categories:

- Communicating the interests of Afghanistan's business community to the government via public policy roundtables and direct advocacy efforts.
- Providing information on domestic and international trade missions and exhibitions, as well as organising conferences, seminars, and matchmaking events.
- Providing business and investment related information as well as advice on business and investment opportunities.
- Maintaining and providing up-to-date information on public tenders and procurement opportunities.
- Publishing a monthly magazine which includes up-to date business information and the contact information of new members.
- Offering member discounts for rental of conference rooms with telephone, internet, simultaneous translation equipment and photocopier machines as well as other facilities.
- Providing business development, advocacy and arbitration services.
- Facilitating visa application procedures.

## Afghan-American Chamber of Commerce (AACC)

**The Afghan-American Chamber of Commerce (AACC)** is the leading organization facilitating U.S.-Afghan business, investment, and trade ties. AACC serves the interests of its members through numerous programs, advocates for a free and open market economy in Afghanistan, and endeavours to strengthen U.S.-Afghan economic relations. AACC works to ensure that Afghanistan's economic development remains a priority for U.S. and Afghan policymakers and serves as a link between business and government to encourage progressive economic policies that will result in increased business and investment between the U.S. and Afghanistan.

It is the goal of AACC to promote the exchange of information and provide resources to members through investment conferences, seminars, networking events, publications, and other avenues to stimulate U.S.-Afghan business and investment. AACC is a growing national organization, bringing together companies, organizations, and individuals with a stake in helping Afghanistan succeed and developing opportunities in an emerging economy.

Strategies Extensive and sustained efforts will be needed to achieve the challenging goals of establishing open-market economy and democratic values in Afghanistan. AACC in partnership with ABC, AA, and other pertinent groups and individuals will:

- Strengthen the role of business associations in Afghanistan and promote sound corporate governance measures;
- Create an Afghan National Business Agenda (ANBA);
- Mobilize small and medium-sized enterprises to create the critical mass to drive the reforms stipulated in ANBA;
- Reform institutional structures that create barriers to participation in the formal economy and democratic decision-making;
- Create open systems of feedback to government including legislative hearing, regulatory review panels, and citizen advisory panels; and
- Provide training for association leaders, businessmen, and businesswomen.

#### Sponsors:

## **Membership:**

AACC serves and welcomes membership from diverse audiences including  
U.S. companies interested in investing or doing business in Afghanistan  
Afghan companies interested in investing or doing business in the U.S.  
U.S. companies owned by Afghan-Americans  
Companies interested in doing business with the Afghan-American community.

Organizations, institutions and individuals interested in U.S.-Afghan economic relations and Afghanistan's economic development.

## **MEMBERSHIP BENEFITS**

Members take advantage of:

- On-the-ground guidance for doing business in Afghanistan
- Conferences and seminars that highlight business opportunities and strategies for winning contracts, investing in Afghanistan and creating joint ventures.
- A growing network of more than 100 companies and institutions that provides
- access to the resources needed to find partners, project financing and services for business development and securing contracts.  
Guidance on loans and other assistance available through agencies such as
- Overseas Private Investment Corporation (OPIC), IFC, SEAF, Afghan Banks, etc.
- Opportunities to contribute ideas and concerns directly to U.S. and Afghan policymakers in order to promote a pro-business, pro-job creation agenda and focus on economic development priorities.
- Access to members-only information and resources on the AACC website.
- Periodic meetings/email updates expose AACC members to leaders in government and commerce and provide the latest business and economic information about Afghanistan.

### **Sponsors:**

## ABOUT AISA

### Who we are?

AISA began as an agency that provided licenses to companies wishing to invest in Afghanistan. AISA has now evolved into a pro-active institution in promoting and attracting investment to Afghanistan. To meet the objective of investment promotion we have restructured AISA as follows:

### Investment Promotion Department:

this department organizes domestic and foreign conferences and exhibitions to promote investment and provides opportunities for "matchmaking" between companies and investors to proactively assist investors through the investment process. In addition, this department conducts media and information campaigns to promote investment initiatives, as well as provide information on government policies and regulations to promote a transparent investment environment.

### Research and Policy Department:

this department serves to analyze private sector development issues, develop private sector strategies, complete sector-specific studies on business and investment opportunities, and engage in hands-on sector policy advocacy before the Parliament and Afghan government agencies. Investors' Support Department: this department offers individual client services during the entire pre & post investment phase. Services include:

- Provision of initial information and advice for foreign and domestic investors: market situation, legal framework, customs, taxation, insurance, availability of key inputs, support programs, investment incentives and opportunities;
- Continuous contact to key investors (each investor support manager has his/"her" assigned clients to be assisted during the whole process: "One phase to the customer");
- Facilitating support to investor from other government or private bodies (e.g. Private Business Development Services, chambers, donor projects); "
- individual troubleshooting for investors
- close contacts/good relations to key government and other key agencies
- training of license holders on important topics (e.g. marketing, bidding procedures esp. for domestic SMEs)
- Post investment support for key investors (e.g. on double taxation, legal advice, provision of contacts and information, troubleshooting, visa problems/services).

## Three Good Reasons:

### 1. Afghanistan is a fast growing emerging market of strategic importance close to some of the largest and fastest-growing markets in the world

Afghanistan is strategically located between the energy-rich republics of central Asia and the major seaports in South Asia providing a key transit route for central Asian oil and gas to markets in South Asia as well as overseas.

Also Afghanistan has natural access to markets of neighbouring countries including important fast-growing markets such as China, India and Pakistan.

### 2. Afghanistan offers a pro-business minded environment with legislation favourable to private investments

The principles of a free market economy are incorporated in the new Constitution {art. 10} just as the growth of the private sector is a cornerstone of the National Development Strategy. Consequently the President as well as the Government have focused intensely on removing obstacles to private sector development.

### 3. Afghanistan is rich in natural resources

Afghanistan is remarkably rich in mineral resources. There are currently more than 1,400 identified mineral deposits. These include energy minerals such as oil, gas and coal as well as iron and copper deposits of world quality.

Furthermore known precious and semi-precious stones in Afghanistan include emerald, jade, amethyst, alabaster, beryl, lapis lazuli, tourmaline, ruby, quartz, and sapphire. Finally great opportunities for investments exist within the hydrocarbons industry. Following the national privatisation programme most of the major state-owned enterprises have been slated for international tender 2006-2008 which has made entry into all these sectors easier.

# Afghanistan Investment

## Priority Sectors:

### 1. Agriculture and agriculture-related industries

Agriculture is a fundamental means of livelihood in Afghanistan, generating 50% of the country's GDP and supporting 85% of its people. The climate of Afghanistan is well suited for the cultivation of horticultural crops and Afghanistan is the geographic origin of many high-end crops like raisins, pomegranates, pistachios and almonds.

There are approximately one million farms in Afghanistan and more than 2,000 wholesalers for horticulture products. Intensive commercial farming increases sustainable economic growth in rural areas, encourages competition, contributes to regional development and helps sustain the growth of private businesses related to it. Investment in agro-business and agro-processing will make a positive impact on the economic development of Afghanistan and will give Afghans pride in producing and purchasing local Afghan products. It should be the goal of a modern agricultural sector for Afghanistan to become self-sufficient again and subsequently be able to expand into an export industry.

One industry related to the agricultural sector is for example packaging which provides great opportunities for investors, as demand for Afghan agricultural goods is high, but current packaging procedures are outdated and damage fresh goods en route to markets and prevents an effective export business for many crops. Some 20-40% of post-harvest horticulture products are wasted because of poor packaging.

Processing is another great investment opportunity. It is estimated that the processed fruits and vegetables market amounts to around 1.4 to 2.5 billion Afghani (US \$28-60 million)<sup>7</sup> demonstrating that the market potential for processed agricultural products including snack foods, packaged biscuits, fruits concentrates, pickles and fresh fruit jams is enormous. An example is fruit juices whose market value in Afghanistan is approximately 20 million USD with a yearly growth rate of around 15%.<sup>8</sup> In 2003 alone, Afghanistan imported 40 million litres of juices, mostly from Pakistan and Iran.

Domestic production of machinery related to the agro-business and agro-processing industries is a lucrative opportunity for investors given that current equipment in Afghanistan is currently imported from abroad, or date back from the Soviet era. Demand for new machinery, such as grain cleaning and sieving equipment for flour, and tractor trolleys and ploughs, will continue to grow and be vital to the production of agricultural goods. In the long term, the manufacture of local machinery will be profitable to the agricultural industry.

## 2. Construction materials

Another interesting area of investment is the construction materials industries in order to improve the supply of quality products from within the country. These, if up to international standards, might grow into an export industry and hence have a future that way.

While in the first years of reconstruction it was mainly foreign construction companies who attracted the major construction contracts, it is now the local construction industry which is shaping up to acquire the necessary capacity to take over from their international competitors as they offer a considerable price advantage.

Good quality construction material produced locally will hence be an important and profitable sector to drive the local construction industry.

## 3. Telecommunication

Core telecommunication service providers supply the Afghan market already in a sufficient manner with increased competition and price pressures. While there are still opportunities for mobile service providers, a far more virgin market represents the supply and service area of the telecommunication sector. Examples are: Data processing, basic business-processing operations information and communication technology (ICT), data transfer, process control and perhaps call centres. These areas are attractive as they do not depend on the overall infrastructure of Afghanistan such as airports and roads but investors can bring and rely on their own infrastructure such as satellite communication equipment etc.

# Afghanistan Carpet Industry

Afghanistan has been the traditional manufacturer of Carpets and rugs. However carpet industry and the export of carpets and rugs suffered badly when the Taliban came to power. Most of the carpet weavers fled to Pakistan and returned only after the Taliban were defeated. The carpet sector is one of the most important sector from which Afghanistan earns a lot of foreign revenue. In 2002/03 carpet exports accounted for 47 % of the country's export earnings. To boost this sector, United States have provided assistance to Afghanistan. According to statistical data, in 2005, Afghanistan sold abroad \$140 million worth of carpets. Most of the carpet manufacturers and skilled craftsmen have migrated to Pakistan. The officials are trying to repatriate them. If government can bring back some of the carpet industry that have migrated to Pakistan, the size of the industry would doubled. USAID has projected the growth of this sector 11 percent a year. It is estimated that by 2015, Afghan carpet exports would reach \$350 million. The carpet industry of Afghanistan, employs more than 1 million people, about 3 percent of the population. Millions of people are working in the associated industry like wool production, cutting, washing and design. Since this industry has a huge export potential, government and private sector are supporting it vigorously.

## Opportunities in the carpet industry:

Given the large potential in the Afghan carpet industry many concrete profitable investment opportunities exist. A number of carpet factories have already been established over the last years in Afghanistan. These factories have various advantages over traditional home production. Completion time is drastically reduced, since electricity makes longer working hours feasible. Permanent monitoring increases the quality of the product and information and skills are being exchanged between workers. Similar arguments apply to spinning factories where the yarn is being spun by hand.

Currently, washing, trimming, and finishing facilities hardly exist in Afghanistan. This lack is a major bottleneck for the development of direct access to the overseas markets. They are a central cause for the dominant market position of Pakistan-based middlemen. The establishment of such activities is very profitable for investors.

The fact that Afghan carpet traders have been widely excluded from directly exporting to the overseas markets has diminished their contacts and knowledge of these markets. Given the particular potential of Afghan carpets this underlines the opportunities that exist for people that possess this international market knowledge. For such actors substantial business opportunities exists by engaging in trading activities, as they can cut into the profits of the few established, often foreign-based traders. More efficient production using modern information technology. Currently, most designs are sketched and plotted by hand. Investment in computer aided design (CAD) technology and associated training has substantial potential for efficiency gains. This also facilitates the interaction with overseas customers who can interact in the production process.

# Afghan Marble Offers Beauty and Hope

Mining is an economic activity that has occurred in Afghanistan for thousands of years, the commercial development of the marble sector requires investment, legal/regulatory reform, training, and the cooperation of key stakeholders for its potential benefit to be realized by generations to come. The marble sector has the potential to generate thousands of jobs and millions of dollars of revenue, providing a valuable product to domestic and international markets and increasing prosperity for Afghan communities. Nationwide, there are over 60 known deposits of dimension stone, comprising 35 varieties, in over 40 colors, including fine-grained white marbles. Despite the presence of these significant mineral deposits, the mining sector has yet to realize its capacity to meet either domestic demand or the significantly larger medium and long-term demand of international markets.

## Categories of Marbles:

Afghanistan has an abundant supply of some of the most beautiful and durable marbles in the world. Afghanistan's Chesht and Khogiani marbles have been favorably compared to Carrara marble, an Italian marble that is considered to be one of the finest in the world. Approximately 80 percent of Afghan marble is exported as rough-hewn blocks and is often reimported, mostly from Pakistan, as higher-value polished marble products for Afghan reconstruction projects. The Afghan marble industry lacks proper equipment, has little technical knowledge, and uses poor extraction methods. Those issues often degrade the value of the marble and destroy a large portion of the stone that is quarried. In response to the situation, an entire day of the conference was devoted to technical skills development for local quarry operators and processors. Increased investment in the Afghan marble sector could address the need to modernize the extraction equipment and process at the quarries. The promotion of modern extraction methods and financial assistance in purchasing or financing more modern equipment would allow existing quarries to begin producing more and better-quality marble from known deposits.

## Promoting Investment, Reducing Violence:

The Afghan marble sector has the potential to generate thousands of jobs and millions of dollars in revenue by providing a valuable product to domestic and international markets, thus increasing the prosperity of Afghan communities. Not only is increasing investment critical to helping the welfare of Afghan citizens; it is also essential to reducing and preventing insurgent activities. Violence in Afghanistan correlates with an absence of jobs, security, and viable alternative livelihoods. The marble industry is a significant source of national pride for Afghans, and it offers an opportunity for employment growth. Moreover, it can meet international demand for a unique natural resource.

### D.BUILDING CONSTRUCTIONS & SERVICES:

The Building & Services Business Unit is responsible for all advanced civil and industrial building construction projects, for facilities management (maintenance and management of property and clinical engineering for hospitals) and for disposal of real estate initiatives.

**Haji Ali Akbar Zhawandai**  
**Vice Chairman**  
**Azizi Bank**

Haji Ali Akbar Zhawandai (Vice Chairman, Azizi Bank)  
Azizi Bank , Head office, Zandab Square, Main Road Kabul  
E-mail : zhawandai@azizibank.af  
Mobile: +93 799 007272, +971 50 6548752

Azizi Bank is a commercial bank set up in Afghanistan in terms of the licensing policy of Da Afghanistan Bank, the central bank of the country. The bank was granted a license on 13th June 2006 and commenced operations from the same date.

The bank has been promoted by two leading Afghan businessmen - Mr Mirwais Azizi (of the Azizi Hotak Group whose business headquarters are in Dubai) and Haji Ali Akbar Zhawandai. The promoters have other wide-ranging global trading interests ranging from petroleum trading, real estate development and retailing to distributorship of branded vehicles, watches, tyres etc.

The bank was set up with an initial paid-up capital of USD 7.5 million which is 150% of the central bank stipulated minimum of USD 5 million. The capital has since been raised to USD 34.5 million. The promoters have plans to induct fresh capital of USD 20 million during the next year ending 31st December 2010.

The bank has a qualified and experienced Management team that works under the overall direction of the Board of Supervisors (BoS). The senior management is drawn from experienced bankers and comprises the Chief Executive Officer (CEO)-Mr. Deepak Shrivastava, the Deputy CEO- Mr. Inayat Fazli and functional heads looking after Operations, Finance, Credit and Audit. They are in turn supported by specialists in areas such as IT, Risk management, Marketing etc. and a young and well-trained operating team which is working hard to provide a unique and truly professional and pleasurable banking experience to the bank's customers. The bank today has a 1000+ strong workforce and takes pride in being an Equal Opportunities Employer (EOE). With a 20% female work-force, the bank is playing a silent but effective role in women's emancipation and empowerment in Afghanistan.

In order to develop its human capital, the bank has set up a well-equipped training where regular courses are conducted for the staff. The training centre is an important

part of the bank's strategy for capacity building in a nation starved of skilled resources especially in the field of banking and finance.

Large investments have been made by the bank in physical infrastructure and technology with a view to provide the right ambience and latest facilities to prospective customers. The bank's credo is financial inclusion and today it has a pan-Afghanistan footprint with a total of 47 branches across the length and breadth of the country. The extent of penetration can be gauged from the fact that the bank has over 200,000 retail/ corporate customers and a stable and growing deposit base of over USD 300+ million.

The branch network is expected to go up to 80 branches by the end of the next year and this would be supplemented by technological initiatives e.g. introduction of ATMs, Internet banking (view only facility already provided) and debit/credit cards. The horizontal and vertical expansion plans of the bank are expected to provide a thrust to the development and rebuilding of the banking culture in a post-conflict economy. The fast growth achieved

by the bank over the three years of its existence has few parallels and has already catapulted it to the undisputed second position among all commercial banks in the country and became the fastest growing Bank in Afghanistan. Having established itself as a key player in the domestic market, the bank now proposes to set up overseas branches.

Enterprise is being promoted through Fund-based facilities e.g. Term/Working capital Loans and Non-fund based facilities e.g. Letters of Credit (LCs) and Bank Guarantees (BGs) for Trade and Industry. The credit portfolio of the bank is spread across all sectors of the economy and the bank now has plans of foraying into SME Finance and Micro Finance. Local/ international remittance facilities are available to account/ non-account holders as the bank has a correspondent banking relationship with leading global banks e.g. Commerzbank, Standard Chartered Bank, Bank of India, HDFC Bank and TC Ziraat Bank. The bank is not only a member of SWIFT but inward/outward remittance facility is also available through Western Union.

The bank is operating on a core banking platform and the backbone for the CBS is a robust micro-wave connection. The branches are connected to the data centre and the DRS through this micro-wave link. The bank is now planning to leverage its investment in technology by introducing new delivery channels e.g. ATM/ Internet/ SMS/ Mobile/ Phone banking and debit/credit cards etc. In Phase-I, the bank plans to set up ATMs at 20+ locations.

Recently, we achieved another milestone in banking history of Afghanistan by purchasing a bank and restarted the bank with the new name as Bakhtar Bank (100% subsidiary of Azizi Bank) with 15 branches.  
Centre

ARCC which is 100% Afghan owned company, Founded in 2002 and started it's mission as a construction, supply and Service Company. The main purpose of ARCC is to support the reconstruction of Afghanistan by providing civil engineering service to the various international organizations willing to restore peace, stability, social welfare and economical growth in the country. ## **Afrein International Logistics Services Company**

### **To Whomsoever It May Concern**

Afrein International Logistics Services Co was established 2 years ago in Dubai and before this we were a partner of Red Orange Co, and now we are a joint ventured. We are a company based in Dubai that has been committed to see fruit bear in the regions we are present in. we are present in Iraq, Sudan and Afghanistan. In Afghanistan we are registered with (AISA) Afghanistan Investment Support Agency with the license No. I-11088 and also registered with (ACCI) Afghanistan Chamber of Commerce, too. Our headquarters is located in Dubai.

Dubai being the hub for almost all global vendors, we are a position to procure almost all the items you'd need locally. Moreover, it brings savings with logistics costs from USA and Europe. If the items cannot be found in Dubai, then Afrein International Logistics Services Co partners with key carriers that offer the most consistent transit and largest lift. Because we contract with these carriers, we gain leverage in both space allocation and pricing. To offer the most direct, economical routing of your cargo, we contract with multiple carriers, allowing us to create the greatest possible flexibility in routing and pricing. Our charter expertise allows customers to have a bitable alternative to scheduled airline lift. Afrein International Logistics Services Co's air charter program provides customized solutions when commercial airline capacity alone will not adequately service your special requirements.

میوند بانک  
Maiwandbank

# Maiwand Bank

## Background

Maiwand Bank is licensed as a commercial bank in Afghanistan and commenced operation on January 1, 2009. The Bank has been promoted by a group comprising professionals and investors from Afghanistan and is supported by a management team of experienced bankers with extensive international exposure, including local talent with experience and sound training. The Bank provides a comprehensive range of traditional and modern banking products and services. The Bank expects to make an active contribution in promoting economic aspirations of the country within the norms of prudent banking operation. The Bank is focused to establish a strong banking presence in Afghanistan and to develop itself as a full service international bank.

The mission of the Bank is to be the foremost leader in the nature of its business in the country. The aim of the Bank is to understand the needs of its clients and live up to their expectations. The underlying purpose in all its' endeavor is to provide safe and efficient banking possibilities to its customers.

The Bank has identified principal growth areas in Afghanistan for potential banking contribution, comprising agriculture, agro-based industry, mining, infrastructure, real estate development, education, business services, SMEs, and international trade. This is notwithstanding conventional banking services in the general market place, based on the state of the art technology.

The market conditions and bank's potential capability augers well for contributing its due share in the growth and development of the country. The evolving economic scenario has prompted promoters to take a confident posture as to the Bank's successful presence in the environment. Through various strategic efforts and action programme, the Bank will position itself to achieve the best and to anticipate the changes and needs of the market and move quickly and decisively where and when warranted.

## **Marco Polo** **Commodities**

Marco Polo Commodities, one of Afghanistan's leading commodity merchants and processors of agricultural products, has merchandised and traded bulk commodities in international markets since 1973.

Marco Polo Commodities is ranked number one in Afghanistan for wheat imports and is one of the largest importers of sugar with a 15-percent share of the local market. The company is also a leading importer of Steel products (Flats and longs) and oil products for the Afghan Market.

Marco Polo Commodities has an emerging regional presence. Mainly in Central Asian countries of Uzbekistan, Tajikistan, Turkmenistan and Russia.

Marco Polo Commodities operates from its head office in Dubai to serve offices in Tashkent, Moscow, Dushanbe, Jeddah, Shanghai and all of Afghanistan.

Marco Polo Commodities is an affiliate of the Mohib Group, an organization of diversified companies privately owned by the Mohib family. Ibrahim Mohib, the Chairman of Marco Polo Commodities, was formerly founding chairman of the Afghan Business Council of Dubai and the Northern Emirates, founding shareholder of the Afghanistan International Bank, founding shareholder of Uni Energy, Board of Trustees of the Afghanistan International Chamber of Commerce, Board of Trustees of the Afghan American University of Kabul and Marco Polo real estate developers.

# RANA

## Institute of Higher Studies

**Business Description:** Afghanistan is a country that has suffered from numerous catastrophes due to foreign invasion and civil war. There are so many other reasons that have had a considerably devastating impact on the infrastructures of the country. The economy of the country has been disturbed to a great extent; however, the revival process since the democratically elected government has been so optimistic. One of the very constructive initiatives of this government is giving importance to the private sector, particularly education. The devastating past of Afghanistan was mostly because of illiteracy and lack of education. To play a vital role in the reconstruction of Afghanistan, establishing an institute for higher education, such as RANA Institute is a milestone in the overall progress of the country. RANA Institute of Higher Studies is a private institute providing quality higher education to the young generation of Afghanistan. **Vision:** RIHS will be a top-ranked, global research institution that creates a nurturing and learning environment for our students. It will provide a welcoming and stimulating environment for our friends and supporters, and will serve as both a source of pride for our country and a leader in its economic and cultural development. To do this requires attracting a diverse, world-class faculty. **Mission Statement:** A caring and socially responsible institution that maximizes the potential of individuals and organizations in Afghanistan to attain meaningful careers, to enjoy enriched lives through globally recognized academic programs. **What RANA Provides:** RANA Institute of higher Studies provides services in the higher education private sector under specific undergraduate and diploma programs in the best possible quality to the young generation of Afghanistan. **Market Size:** The mobile communications market for personal communication systems (PCS) and enhanced satellite mobile radios (ESMR) is projected to grow from \$14M in sales to \$600M in sales by 1997. The

market penetration is projected to grow from 6.45 percent in 1993 to 19.23 percent in the year 2000. Company's new rugged terminal (in partnership with AMSC and other OEMs) is targeted specifically to fill a void in the mobile communications market for trucking, shipping, fleet management and route management applications.

**Customers:** Our largest current customer for the programs RANA Institute offers in the most demanding fields of management sciences and computer sciences are the young generation from a population of over 4 million people, the majority of which are aged between 18 to 25. **Investment:** Amount initially invested: \$ 1,000,000

**History:** company has been funded by the investor Ahmad Aqa Miskeenmal  
**Next Major Milestone** to be accomplished and **Timing:** in addition to the facilities and programs, RIHS is keen to raise the institute to the university level by fulfilling the requirements of a University by the year 2010. **Master degree programs** in the campus owned by RANA Institute. **Personnel - Present or Contemplated:**

" **President:** Abdul Majeed Niazi; previously with international NGOs and lecturer at universities with more 7 years of experience." **Marketing:** Ahmad Shahab Miskeenmal; A young and energetic MBA graduate with 3 years of related experience." **Finance:** Mr. Asir Shah, CMA finalist with 5 years experience in the field." **Operations:** Mr. Nasir Ali; MBA finance with 4 years experience of teaching and practice in the related field.
